Problem
Ecs Assistant related files require special handling for Drop 4. Due to extensive, non-backward compatible modifications, ECS Assistant and certain DCE files will be installed into new temporary directories.

Proposed Solution

DROP 4 Installation Instructions
(With Special Instructions for ECS Assistant)

PLEASE NOTE:ECS Assistant related files require special handling for DROP 4. Due to extensive, non-backward compatible modifications, ECS Assistant and certain DCE files will be installed into a new temporary directories. Please follow instructions carefully.

1. Installation Delivery Steps

1.1 Delivery steps is files are provided in system delivery

Run each architecturally dependent Installation script on appropriate machine:

EcsDeliverySetup4HP
EcsDeliverySetup4SGI
EcsDeliverySetup4SUN

When prompted with "Update Ecs Assist Common Files?", answer N (NO!)

Included in each architecturally dependent tar file is a tar file which has the latest version of ECS Assistant and related files.

i.e., EADelPkg${VIEW}.tar
where ${VIEW} is an architecturally dependent view used to
create software delivery files.In this case ${VIEW} can
be "DROP4_sun5.5" or "DROP4_sgi6n32" or "DROP4_hp".

Untar EADelPkg${VIEW}.tar from delivered tar file into a temporary directory (e.g /tmp)

1.2 Delivery step when EA files are provided as a separate delivery

Untar the delivered tar file into a temporary directory (e.g /tmp)

2. Installation into Target directories

Begin by creating two new directories:

./tools/common/ea_new
/tools/common/dce_new,

Copy Ecs Assistant files from temporary directory to tools/common/ea_new.
